

# NovaCloud AI Solutions – ISO27001 Annex A 2022 Compliance Summary

## ❖ Company Overview

NovaCloud AI Solutions is a fictional cloud-based technology company that develops Artificial Intelligence (AI) solutions for business clients. The company uses cloud infrastructure, SaaS applications, staff devices and digital collaboration tools to deliver AI products, manage operations, and store customer information.

## ❖ Scope of Assessment

The scope of this assessment is to cover all key digital and information assets used by NovaCloud AI Solutions.

Assets within scope include:

- Staff laptops and company devices
- AWS cloud infrastructure and servers
- Google Workspace (Gmail, Google Drive, Calender)
- Slack communication platforms
- Customer database and company data repositories
- Payment processing systems
- Internal access management and authentication systems

The purpose of the scope is to ensure that all of these company assets are very sensitive and important are protected against unauthorized access, data loss, cyber threats, and operational disruptions.

## ❖ Compliance Goal

The compliance objective of NovaCloud AI Solutions is to align its information security practices with ISO 27001 Annex A 2022 controls

The organization aims to:

Strengthen information security governance

Protect customer and business data from security breaches

Improve the access control and cloud security management

❖ Key Gaps Identified

The assessment identified several controls that are currently **Planned** but require implementation

A.5.1 – Information Security Policies

The company does not yet have formal security policies that cover areas such as password management, acceptable use and data protection.

Risk: Lack of clear security guidance and governance

A.8.13 – Backup Management

Formal back procedure for cloud systems and business data has not been fully implemented.

Risk: Increased risk of data loss, downtime and limited recovery capability after incidents.

A.8.15 / A.8.16 – Logging and Monitoring
